## Elements Hospitality Design Program

### Phase 2 - Design Process

The Design process encompasses the following activities:

- ✦ Site visit, if necessary, to gain better knowledge of the property, design feel that is necessary, and to photograph all involved areas to assist in your visual aid during the design presentation. If you have pictures on file of the property, which can be used, then a site visit may not be necessary and will be reflected in the design fee.
- ✦ Select fabrics and products from our showroom and design library to present to you during the presentation.
- ✦ prepare and organize picture presentations with digital photos to assist you in visualizing what the outcome will truly look like.
- ✦ Prepare 3-5 options using design boards, pictures, and actual samples to aid in the presentation, keeping in mind the budget and comfort needs.
- ✦ Present the options to you with individual item pricing for everything to show what each design will cost, and how that fits into the budget.
- ✦ Begin the procurement proposal phase once all products, fabrics, and furniture, have been selected by the customer.

Elements Hospitality will give the customer the design options they have selected as well as all the specifications for those products. Feel free to ask to see one of our design boards as well as before and after pictures of projects completed.
